## EDUCATION

### Bachelor of Science (B.S.) in Digital Forensics & Cybersecurity Minor Cybersecurity and Intelligence

Eastern Kentucky University, Richmond, KY  
December 2026

## EXPERIENCE

### Cybersecurity Intern May 2026 - August 2026

- Pelycon Technologies - Lexington, KY
- Supported an MSP environment serving 100+ client organizations, approximately 90 Microsoft Entra tenants, and 1,000+ managed endpoints.
  - Investigated 30+ suspected phishing messages/incidents using Microsoft Defender, Entra ID, Exchange, CIPP, and Huntress; reviewed security data, documented findings, and supported containment decisions.
  - Developed a phishing-response playbook covering .eml/header analysis, identity and email investigation, containment, endpoint isolation, and incident closeout.
  - Reviewed endpoint and vulnerability findings and remediated security issues on 8 Pelycon devices.

### Locksmith Apprentice May 2025 - Present

- Eastern Kentucky University - Richmond, KY
- Support physical security across 50+ campus buildings through key management, rekeying, access-control troubleshooting, and secure key-control documentation.

### Resident Advisor August 2023 - Present

- Eastern Kentucky University - Richmond, KY
- Respond to incidents in an 800+ resident community, operated CSGold and Lenel access systems, troubleshoot access issues, and document after-hours incidents.

## LEADERSHIP

### President & Team Captain August 2022 - Present

- Collegiate Cyber Defense Competition (CCDC)
- Lead weekly cybersecurity practice for 25+ members across Windows Server, Active Directory, Linux, persistence detection, firewall defense, incident response, and Proxmox; contributed to a 1st-place Kentucky finish.

## TECHNICAL SKILLS

- Digital Forensics:** FTK Imager, Autopsy, Registry Explorer, forensic imaging, disk-image analysis, hash verification, Windows Registry analysis, file-system analysis, timeline analysis, artifact correlation, digital evidence handling and documentation
- Security & Network:** Wireshark, Nmap, Microsoft Defender, Microsoft Entra ID (Azure AD), Exchange, CIPP, Huntress, phishing investigation, incident response, log analysis
- Systems & Scripting:** Windows, Windows Server, Active Directory, Linux, Microsoft 365, Proxmox, DNS, Java

## CERTIFICATIONS

CompTIA Security+ | ISC2 Certified in Cybersecurity (CC) | Microsoft SC-300 (in progress)

## PROJECTS

### NIST CFReDS Hacking Case - Portfolio Case Study September 2026

- Analyzed and hash-verified a NIST CFReDS forensic disk image to reconstruct system activity and identify recoverable evidence across Windows host, user, network, email, and IRC artifacts.
- Used FTK Imager, Autopsy, Registry Explorer, and Wireshark to correlate file-system, Windows Registry, host, and network evidence and build an investigation timeline.
- Documented evidence handling, investigative steps, cross-source correlations, findings, and limitations in structured case notes.

### CCDC Proxmox Lab Environment September 2026

- Configured and documented a segmented Proxmox VE lab with static addressing, DNS, gateway, and firewall-aware connectivity testing for Windows and Linux cyber-defense practice.

### Tabletop Forge - GitHub Project June 2026

- Developed an AI-powered tabletop-exercise platform covering ransomware, phishing/BEC, and data-breach scenarios aligned with NIST, HIPAA, FERPA, and PCI DSS.
